Becoming a market leader by focusing on technology

About Infront

Infront is a leading market data and trading solutions provider for finance professionals. It provides a unique combination of real-time global market data, news, analytics and trading tools. With proven solutions developed over 20 years by industry experts - and with product development driven by our clients' business needs - we have delivered the technology to keep our clients ahead of the game. Over 15,000 subscribers in more than 25 countries worldwide rely upon our services.

The Infront terminal has become the most intuitive and flexible financial data terminal available, helping institutions to reduce costs, adapt to fast changing market requirements and to be able to work more effectively with the increasing amount of information available.

Kristian Nesbak
Chief Executive Officer

"We give Finance professionals the most effective tool for making decisions and taking action. Our vision is to become among the top 3 vendors of terminals to finance professionals in Europe by 2022".

- Established in 1998
- Independent, privately owned company
- Over 15,000 users
- Customers in more than 25 countries
- Located in London, Paris, Johannesburg, Cape Town, Stockholm, Copenhagen and Oslo

We strive to develop the fastest and most intuitive front-ends to keep our clients ahead of the game.

The smartest, most intuitive financial platform

Infront Professional Terminal

With markets becoming increasingly complex and participants processing and acting upon ever-growing amounts of data, the Infront Professional Terminal helps you navigate this interconnected network of information with ease. Combining real-time, global market data, news, analytics and trading functionality in a modern and intuitive user interface.

Infront offers you an unparalleled user experience: Get fast and comprehensive access to market data and its underlying details, while digging deeper with a plethora of complex tools and advanced features, such as our noise reduction technology. Noise reduction breaks through the buzz, bringing important market changes to the forefront.

Intuitive

Cost-effective

Easy to Deploy

Customisable

High Speed

Real-time Markets: We connect you to a managed network of global market data, allowing you to make decisions and take action.

Leading News & Analytics: Browse through thousands of headlines from leading news sources, screen through consensus estimates and fundamentals.

Sophisticated Excel Integration: Make your own financial models with the breadth of information.

Advanced Trading: Manage your order flow seamlessly and optimize execution performance.

Value-Added Services: Get access to numerous add-ons such as secure messaging, research databases and OTC data.

Gain an unparalleled view of the market

Infront Market Data

With information on more than 4 million instruments from exchanges around the globe, in addition to several leading specialist sources, Infront provides accurate and comprehensive market data managed securely from our data centres. Our market data is streamed in real time, delayed or at end-of-day, depending on your preference and is accessible on mobile, web or desktop.

**4,000,000 +

Access multiple
asset classes:

Advanced Trading Solutions

Professional Trading Solutions; seamlessly connecting the Front and Back Office

Infront enables Sell-Side and Buy-Side firms to leverage their existing infrastructure with easy-to-deploy, multi-asset class trading solutions. As a trusted solutions provider for leading banks, brokerages, exchanges and other financial institutions around the globe, Infront provides turnkey trading solutions that can be up and running in days.

Whether it be the capability to trade on multiple asset classes, view real-time markets, integrate with existing order or portfolio management systems, Infront offers a customer-driven, preeminent solution for finance professionals with intuitive, easy-to-use front ends.

For the Sell-Side

- Capture more of your clients' electronic order flow
- Customize your interface by markets, order types, asset classes and more
- Integrate your in-house services
- Manage risk and compliance

For the Buy-Side

- Trade electronically based on reliable data
- Optimize your work flow with access to multiple asset classes
- Integrate services for trading and market data
- Customize according to your needs

**Our state-of-the-art trading solution
offers easy access to multiple
instruments and markets through
ONE versatile platform.**

Trade with confidence at your desk or on the go.

Innovative, modern and scalable technology that meet future requirements

Retail Trading Solutions

For brokers and banks looking to minimize spend, but maximize order flow, Infront offers turnkey solutions delivering financial market data, enabling seamless trading integrations and all with a single, unified platform.

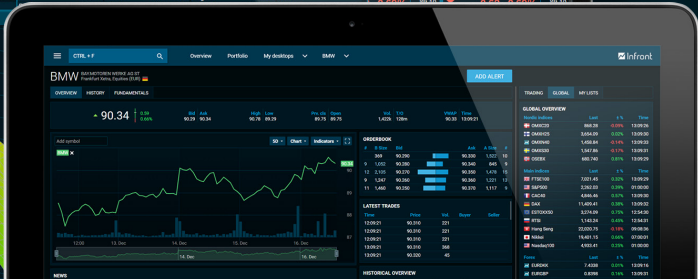

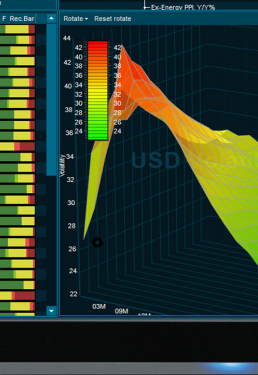

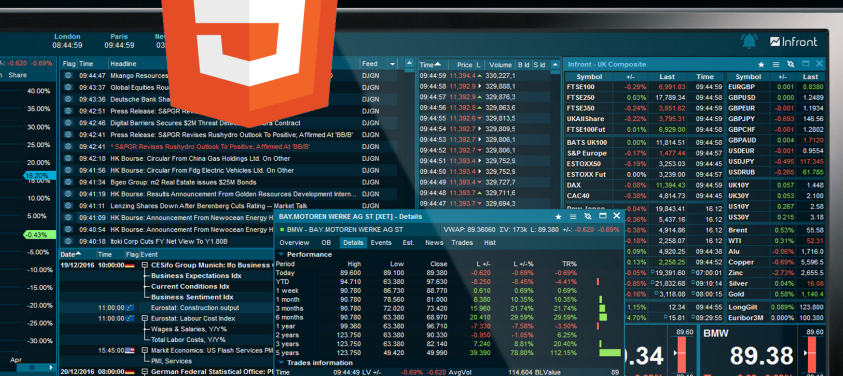

Improve what you offer to your clients with various solutions and decrease your total cost of ownership.

Don't spend time developing (and maintaining) a trading solution yourself.

Features

- Various front-ends for customer segmentation
- Access to global market data
- Integrate with your existing trading environments
- Managed solution
- Integration of proprietary data

HTML

MODERN WEB TECHNOLOGY

Infront's Web Technology

Infront offers cutting-edge web technology based on streaming HTML5 and web widgets. It enables companies to easily deploy and implement proprietary data, whilst gaining access to global market data, and visual elements such as charts, graphs and other analytics. Running on all new web browsers, our web technology is built to last, with responsive design and trading-related services included amongst its features.

Improve what you offer to your clients with various solutions and decrease your **features** of ownership.

- Streaming HTML5 technology
- Managed market data
- Fully integrated trading
- Seamless integration with proprietary data

We service your requirements

Infront Integration Services

Infront offers several integration services depending on your company's needs.

Market data

Integrate your in-house data. OTC prices, time series, markets, membership data. Provide easy distribution to users in a controlled manner. We work with all types of formats such as FastFix, Pitch, Itch, MIT, FTP and XML.

Trading

Infront provides trading integrations to order management systems, portfolio management systems or trading networks. Our interfaces include FIX and FIXATDL and Infront provides standardized APIs.

Portfolio System

Infront provides services for importing and exporting data into your portfolio management system.

In-house Research

Integrate your research. Display in various formats such as PDFs and graphical elements.

News, Messaging and Chat

Infront has various and secure communication channels within our technology, enabling you to communicate with your end users.

Custom Development

In need of specialized functions to improve workflow efficiency, functionality, or content, we are here to help.
