

The new Infinancials Excel Add-in 2.1 version improves user experience with simplified toolbar, context menu, functionalities wizards, table layouts and output formats. The Excel Add-in is now easier to use, much more efficient and better suited to user needs.

Infinancials Excel Add-in 2.1 has been designed for Microsoft Excel versions from Excel 2010 onwards.

➔ Main Features

Infinancials Excel Toolbar

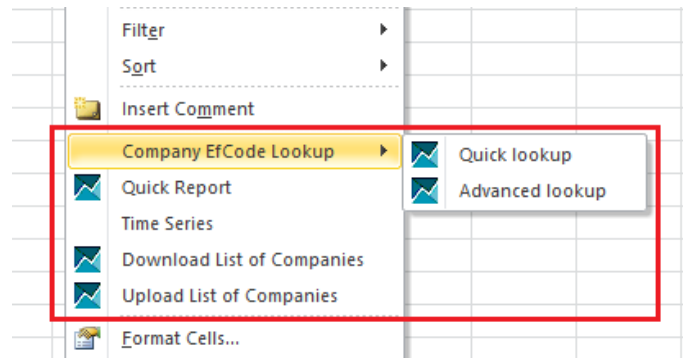

Infinancials toolbar has been simplified with fewer menu options and large icons for a better identification of the key functionalities. A quick description is displayed when rolling the mouse over the buttons.

- **Connection:** check connection status and log in with Infinancials credentials
- **Refresh:** refresh at the same time all Quick Reports and / or Time Series data tables available in a worksheet or a workbook
- **Quick Report:** generate a formatted data table for a single company or a list of companies, with several output options. Access all available items from Infinancials database
- **Time Series:** generate an historical data table for companies, indices, currencies exchange rates, with several output options
- **Lists:** download a list of companies from My Lists, index constituents or predefined lists of peers
- **Model Library:** access prebuilt models for company and comparable analysis: valuation multiples, ratios, beta, volatility, quotes
- **Restart Engine:** cancel pending operations and restart when the add-in does not seem to respond
- **Options:** access add-in options such as preferences for Excel startup or connection mode,
- **About:** check current version, installation path and get the latest updates

Infinancials Right-Click Menu

Infinancials context menu has been revamped with fewer options, mainly used to find Infinancials identifiers (EfCodes) corresponding to a company name, ticker, ISIN code or a list of company names, tickers, ISIN codes or to upload and save of list of companies available in an Excel spreadsheet under My Lists.

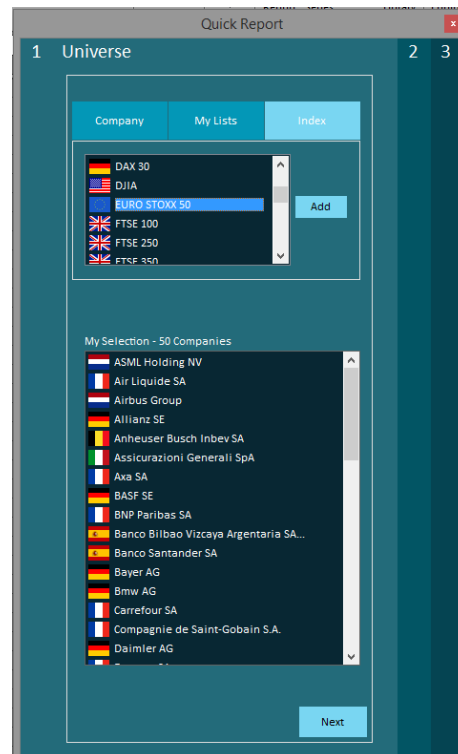

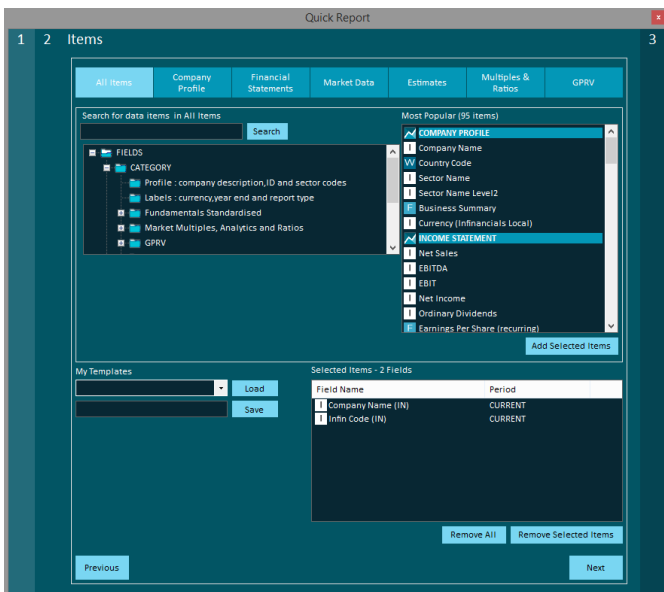

Quick Report Wizard

The new Quick Report wizard is made of three steps for an easier selection of report settings:

- **Universe of companies**
- **Financial data items and periods**
- **Output settings**

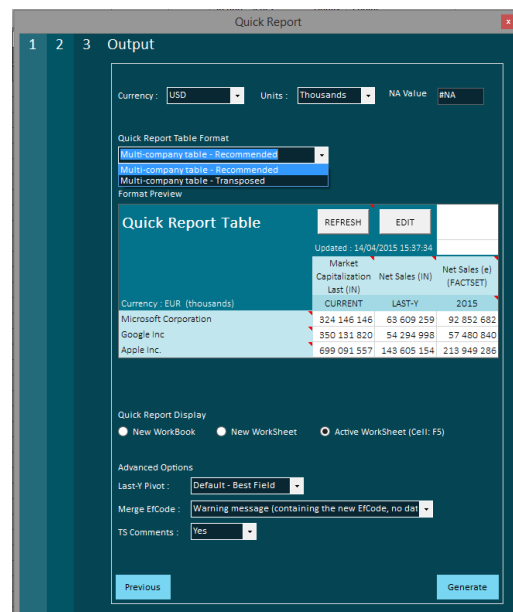

1. **Universe of Companies:** search for companies using names, tickers, ISIN codes, EfCodes, or select companies from personal lists and Index constituents.

- Items selection:** search and selection of database items. By default, “All Items” view is selected and most popular items are displayed in the Search Results. It is recommended to use Most Popular items, search by typing item name or browse all categories to find the items needed. New “My templates” feature allowing to save the items list (template) for further reuse in another Quick Report.

- Output settings:** selection of output currency, units, table layout format and report table location preferences.

Quick Report Table Layout Changes

1. Column Headers

In the Excel add-in 2.0 version, data items were labelled using three cells (Item name, item code and reference time period):

Net Sales (IN)
53002
2010

In the 2.1 version, column headers have been simplified:

- Item name (with the code in cell comment)

Net Sales (IN)	53002
2010	

- Reference time period (unchanged)

Net Sales (IN)	53002	REFRESH MODE:DYNAMIC REFRESH PERIOD:LAST-Y-1
2010	7 702 589	
	1 402 534	

2. Company Names and EfCodes

In 2.0 version of the Excel Add-in, EfCodes were displayed in a separate column before company names column.

In 2.1, both are merged within one single cell. Only company names are displayed and company EfCodes are placed in cell comments for a ready-to-use report.

Time Series Wizard

Time Series functionality has been revamped with a similar design as the Quick Report. The new Time Series wizard is made of three steps for an easier settings selection:

- **Universe of companies**
- **Financial data items and periods**
- **Output settings**

1. **Universe of Companies:** search for companies using names, tickers, ISIN codes, EfCodes, or select companies from personal lists and Index constituents.

- Items selection:** search and selection of database items. New “My templates” feature allowing to save the items list (template) for further reuse in another Quick Report.

- Output settings:** selection of output currency, units, table layout format and report table location preferences.

How To?

How to add companies in a Quick Report without using EDIT function?

→ If the company EfCode is already known:

Enter company EfCode in the first available cell after the last company of the list, and click REFRESH button. The corresponding company name will be displayed in the cell and all data items will be automatically filled in.

It is easy to find a company EfCode using Infinancials web platform. The EfCode

How to add a data item into a Quick Report without using EDIT function?

To add a data item to the Quick Report table, enter the item code in the first available cell after the last item name. In the cell below, enter the reference time period (for example "2014", "LAST-Y") and click REFRESH button.

Note: for time series data items (values at a specific date), it is necessary to repeat the item code together with the date in the reference time period cell separated with a "/" (Example: "11287/TODAY" or "11261/20151231").

	2012	2013	Time Series	Time Series
Daimler AG	114 297 000	117 982 000	6,88	6,88
Ford Motor Company	101 752 312	106 887 595	5,89	5,89
Honda Motor Co., Ltd.	81 816 638	83 343 176	8,68	8,68
Nissan Motor Co., Ltd.	79 759 424	73 772 440	7,12	7,12
Fiat Chrysler Automobiles NV	81 734 268	83 854 853	4,45	4,45
Toyota Motor Corp.	182 752 347	180 811 003	8,09	8,09
Suzuki Motor Corp.	21 355 574	20 678 863	12,17	12,17
Bayerische Motoren Werke AG (BMW)	76 848 000	76 058 000	7,40	7,40
Renault SA	41 270 000	40 932 000	6,04	6,04
Peugeot SA	55 446 000	54 090 000	7,04	7,04
Mitsubishi Motors Corporation	15 034 140	14 732 706	8,22	8,22

The easiest way to add an item to a Quick Report is still to use the EDIT tool and select the desired data item in the wizard.

How to add a company to a Time Series report table?

Quick Report and Time Series are separate functions and do not work the same way, even if the wizards look similar. To add companies to a Time Series table, the best option is to use EDIT function. However it is possible to add companies by entering additional EfCodes to the first row of the Quick Report (directly on the first cell available on the right of the EDIT button. Click REFRESH button to update the Time Series tables.

	Close Price USD	Close Price GBP	Close Price EUR
29/04/2016	4 341.2990	62.4189	4.4500

How to link a Quick Report to a separate list of companies?

For modeling purposes, it is often necessary to link a Quick Report to a list of companies available in another worksheet. To do so, the Quick Report input cells (companies) have to include an Excel formula with a link. A click on REFRESH button will update the report using the corresponding companies.

The diagram illustrates the process of linking a Quick Report to a separate list of companies. It is divided into three stages:

- Initial List:** A list of company codes (EFCodes) in a worksheet: 90042EF, 30296EF, 30265EF, 90140EF, 30384EF, 30345EF, 30388EF, 30261EF, 30566EF, and 30695EF.
- Quick Report Setup:** The Quick Report interface is shown with the input cells containing the formula `=Settings!C40`. The report header includes "Quick Report", "REFRESH", "EDIT", and "Updated - 12/02/2016 11:34:23". The data table has columns for "Currency : USD (thousands)", "2012", "2013", and "2014".
- Updated Report:** After clicking "REFRESH", the report is updated with data. The "Updated" timestamp is now "12/02/2016 11:39:49". The data table is populated with values for each company code across the years 2012, 2013, and 2014.

Currency : USD (thousands)	2012	2013	2014
90042EF	13 542 322	13 871 454	12 850 000
30296EF	11 669 169	11 840 768	11 000 000
30265EF	1 605 352	1 854 194	2 770 000
90140EF	1 920 860	2 244 253	2 130 000
30384EF	251 208	290 146	290 000
30345EF	177 151	196 123	196 000
30388EF	424 113	445 607	415 000
30261EF	1 216 187	1 240 151	1 120 000
30566EF	416 141	471 680	430 000
30695EF	167 333	195 013	170 000

If the input list is a list of company names and not a list of EfCodes, then it is necessary to use Quick Lookup function to get company EfCodes. (select all company names / Quick Lookup).

How to add company names and EfCodes columns in a Quick Report?

In a linked Quick Report table, the first column of the Quick Report displays EfCodes only. Displaying corresponding company names is easy. Simply add the “Company Name (IN)” (item code: 20002) field using EDIT button.

Conversely, it is sometimes needed to export the list of companies EfCodes from the Quick Report to reuse the list in another workbook or worksheet. Click EDIT button, select the “Infin Code (IN)” (item code: 20000) item. A new column will be added to the table, with all the needed EfCodes.

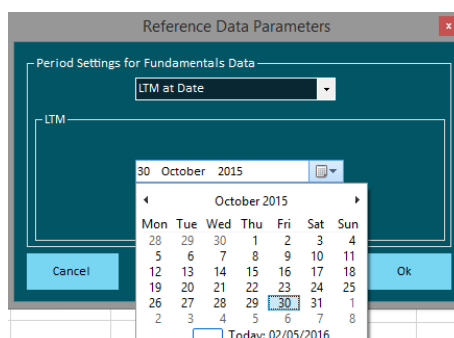

Company Name (IN)	Infin Code (IN)
CURRENT	CURRENT
Ekinops SAS	31290EF

Other New Features

Quick Report - “At Date” financial items for historical valuations

It is now possible to download annual, interim or LTM (Last 12 Month) financial statements as they were available at a specific date in the past. This is useful for historical valuations

In the Quick Report wizard, select for instance “Net Sales” (WVB source). In the period settings window, choose LTM and select the desired date.

Quick Report - Infinancials Local Currency

Infinancials Local currency has been modified. There is now only one Local currency per company.

Automatic Check for Updates

A process is now silently checking for updates at Excel start-up, in order for the user to be sure to always run the latest version.
